

***AT4 wireless completes testing of first Bluetooth®
Manager for Continua Health Alliance Certification***

Malaga, Spain, February 3, 2010 — AT4 wireless, a leading wireless certification and testing laboratory, announced that it has successfully completed certification testing for the first Continua Certified *Bluetooth®* Manager device, the Toshiba *Bluetooth* Stack for Windows.

Toshiba's *Bluetooth®* Stack for Windows is the first *Bluetooth* manager that has demonstrated compliance with the Continua requirements, therefore ensuring interoperability for the reception of the data produced by medical devices. It becomes the first publicly announce-able Continua Certified Manager.

AT4 wireless was selected at the end of 2008 by the Continua Health Alliance, an open industry group of technology, healthcare and fitness market leader companies to provide certification testing services for health and fitness devices based on Continua Health Alliance requirements, and to develop a fully automated Test System that will be used for the Continua Health Alliance certification program.

"The certification of this Continua *Bluetooth* Manager is a real success and a great milestone for the Continua Health Alliance. AT4 wireless is pleased to contribute in this new industry hit increasing the market of interoperable personal health systems, which is the mission of the Continua Health Alliance.", said Jose de la Plaza, Telecommunications Laboratory Manager at AT4 wireless.

"We are developing our *Bluetooth* stack to promote the *Bluetooth* technologies and to create a new value for users. We believe that healthcare applications will take a facilitating role in helping people make healthcare a daily routine, which is significant for Continua. Our software stack will help making these applications easily. You can create your business on healthcare system by using this stack." said Katsumi Adachi, Chief Specialist of Strategic Technology Alliance Div., Personal Computer & Network Company, Toshiba Corporation.

About AT4 wireless

AT4 wireless is a global supplier of **Testing Services, Engineering** and **Test Systems**.

From its **Laboratories Division**, AT4 wireless provides Testing and Certification Solutions for a wide range of industrial sectors (telecommunications, information technologies equipment, automation, medical and health, electronics, aerospace, naval, photovoltaic and gaming technology, among others), with the aim to guarantee that products comply with the quality and certification requirements requested by the global market and users.

AT4 wireless is recognized as the most complete Wireless Certification & Testing Laboratory in the world and a leading manufacturer of cutting-edge test & measurement equipment for telecommunication technologies, having the largest coverage in different technologies (GSM/GPRS/EDGE, WCDMA, HSPA, LTE, WiMAX™, Bluetooth®, Wi-Fi®, RFID and NFC) and a portfolio that ranges from conformance, certification, regulatory, interoperability and performance testing to worldwide compliance services.

AT4 wireless was founded in 1991, has more than 340 employees and operates from its headquarter in Malaga (Spain), and branches in Herndon, Virginia (USA) and in Taipei (Taiwan).
